

## P013 My Mobile

Fun and simple piece for the youngsters ages 3 and onwards.

All bisque items should be cleaned with a barely damp sponge to remove all dust prior to decorating, always avoid wetting the piece.

### Item:

Bisque piece - 10C-14 Mobile Phone

### Colors:

Café Colors - CC001, CC141, CC197

3D Trail Glaze - 3D001

### Tools:

Medium sized soft glaze brush or soft round brush #12

Fine liner or small soft round brush #1 or #0

Soft Square shader brush #1/2"

Round Sponge

Skewer or Stylus

Fan brush

All products should be stirred or shaken prior to use ensuring contents of bottle have been thoroughly mixed. Working with 3D Trail glaze, shake the bottle vigorously, or squeeze with hand. Open and squeeze nozzle to allow any water or air bubbles to escape. If nozzle is clogged, unclog with pin or thin piece of wire. Remove the nozzle after use, wash until clean and place a pin in the nozzle.

Step 1. On a tile squeeze a generous amount of CC197, add a little water and stir thoroughly. Using a medium sized soft glaze brush apply 1 generous coat to the section with the numbers of the mobile phone. When the paint is almost dry, slightly dampen a round sponge with water and gently wipe away the black paint, a little at a time, rinsing the sponge regularly. Remove more paint from around the edges of the phone to give the mobile a weathered look and removing more color from the buttons, leaving the black paint embedded in the grooves of the buttons. **This method is called antiquing.**

Step 2. Working with the CC197, and using a medium sized soft glaze brush or soft round #12 or square brush #1/2" paint 3 even coats to all 4 sides of the mobile phone and the top 1/3 section, allow each coat to dry between applications.

Step 3. Using a fine liner, or thin small soft round brush no bigger than a #1, paint the numbers on the buttons of the mobile phone using the CC197. Starting with number 1 and work through to number 9. Paint the numbers above the line that divides the button. Follow with some letters a, b, c or randomly pick any letter or symbols to paint beneath the line under the numbers.

Step 4. On the same tile squeeze a small amount of CC141, add water if necessary and stir thoroughly. Using either the square shader or medium soft round brush apply 3 even coats to the back of the mobile and the antenna.

Step 5. Applying the 3D001. It is a good idea to practice using the 3D Trail Glaze, on a sheet of paper before hand. Practice drawing long and short, wavy and curvy, thin lines. Once you feel confident to start, begin applying the number '3' and 'G' to the top left hand corner of the mobile. Then apply a fancy spiral resembling a 'G' or '9' at the top right hand side. At the bottom near the base of the phone, add some dashed lines beneath the numbers and outline the rectangle pattern beneath the dashed lines, finishing with 2 short lines inside the rectangle, see image above.

Step 6. When the paint is almost dry use a skewer or stylus to 'etch' or sgraffito 2 lines parallel to each other across the top beneath the '3G and G' symbol and above the buttons.

Step 7. Using a fine brush or small soft round paint 2 thin lines around the '3G and G' using the CC141, and add a few dots above and below the spiral symbol. You may like to add color to the '3G' symbol with either the CC141 or CC197 using a fine brush or small soft round brush; this step is optional you may prefer to leave white.

When dry always remove 'fettlings' or loose paint left behind after sgraffito or etching. Using a fan brush stand over a rubbish bin and brush the loose 'scraped color' into the rubbish prior to glazing.

Once dry brush or dip in clear gloss glaze and fire to cone 06-04.
